DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 9-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Van Der Werf et al (6,122,058).

Regarding claims 1 and 9, Van Der Werf (Fig. 8) discloses a device including a laser 120, a detector 141 for the laser light reflected off measuring surface 145, and a polarization analyzer 210 acting as a mode filter between the surface and detector.

As for claims 2 and 10, the polarization analyzer is a mode filter in this case because laser light has two basic polarization modes, and the polarization analyzer blocks one polarization mode while allowing the other to pass, thereby acting as a mode filter.

Allowable Subject Matter

Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As to the above claims, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a device where the mode filter comprises a beam splitter splitting the light beam into a pair of beams that eventually interfere with one another, this interference

leading to the suppression of a particular mode by the filter, in combination with the rest of the elements and limitations of the claims.

Response to Arguments

Applicant's arguments, see the amendment filed August 29, 2003, with respect to the rejection(s) of claim(s) 1-6 and 9-10 under 35 USC 102 (see previous Office Action) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of US Pat. 6,122,058 as discussed above.
